

Amirul Islam

Full Stack Web Developer

Chattogram, Bangladesh · github.com/AmirulTechie · linkedin.com/in/amirultechie

Career Objective

Aspiring Full Stack Web Developer with a strong foundation in Next.js, React, and Node.js, and a unique background in Accounting (BBA). Passionate about building clean, functional web applications and integrating AI-powered features to solve real-world business problems. Eager to leverage my combined technical and financial domain knowledge to deliver impactful digital solutions.

Skills

Frontend & Language: Next.js, React.js, HTML5, CSS3, Tailwind CSS, JavaScript, HeroUI, DaisyUI

Backend: Node.js, Express.js, JWT, REST API

Database: MongoDB, Mongoose

AI Integration: Claude API (Anthropic), Prompt Engineering, Structured Outputs

Tools & Deployment: Git, GitHub, Vercel, Render, Postman, Figma, json-server

Projects

1. Tilevo – Next.js Tile Gallery Application

Tech Stack: Next.js, Tailwind CSS, HeroUI, Google OAuth, NextAuth.js, Vercel

- Built a full-stack tile gallery application using Next.js App Router with Google OAuth authentication and protected private routes.
- Implemented role-based access with NextAuth.js, ensuring unauthenticated users are redirected and sessions are securely managed.
- Deployed on Vercel with optimized image handling and responsive UI built with HeroUI and Tailwind CSS.

2. FriendshipTracker – React Friendship Interaction Tracker

Tech Stack: React.js, Tailwind CSS, json-server, REST API, Vercel, Render

- Developed a React SPA to track and manage friendship interactions with full CRUD functionality via a json-server REST API.
- Deployed a persistent json-server backend on Render, enabling reliable data storage and live API access for the frontend.
- Built a clean, responsive UI with React state management, handling add, update, and delete operations with optimistic feedback.
